PUBLIC NOTICE

Department of Taxation and Finance
Tax Law Article 13-A Rates

Pursuant to the provisions of subdivisions (e), (f), (g) and (h) of section 301-a, subdivision (b) of section 301-d, subdivisions (b) and (c) of section 301-e, subdivisions (a) and (c) of section 301-j and subdivision (a) of section 308 of the Tax Law, the Commissioner of Taxation and Finance hereby gives public notice regarding the petroleum business tax (Tax Law, Article 13-A) rate adjustment calculation and the resulting rates effective January 1, 2007 (effective March 1, 2007 for quarterly filers) as follows: The motor fuel and automotive-type diesel motor fuel rate is adjusted from \$.096 to \$.100; the nonautomotive-type diesel motor fuel rate is adjusted from \$.086 to \$.090; the residual petroleum product rate is adjusted from \$.066 to \$.069; the kero-jet fuel rate is adjusted from \$.063 to \$.066; the aviation gasoline rate is adjusted from \$.096 to \$.100; the rate of the supplemental tax on aviation gasoline is adjusted from \$.063 to \$.066; and the rate of the supplemental petroleum business tax is adjusted

from \$.063 to \$.066. The separate rate of supplemental petroleum business tax with respect to automotive-type diesel motor fuel is adjusted from \$.0455 to \$.0485; it is computed by subtracting one and three-quarters cents from the adjusted rate of the supplemental petroleum business tax. The railroad diesel rate is adjusted from \$.083 to \$.087; it is computed by subtracting one and three-tenths cents from the motor fuel and automotive-type diesel motor fuel rate.

The utility credit (or reimbursement) rate with respect to residual petroleum product is adjusted from \$.0522 to \$.0548 and the utility credit (or reimbursement) rate with respect to unenhanced diesel product is adjusted from \$.0526 to \$.0552. The utility credit (or reimbursement) rates are further adjusted by adding one-half of one cent to the adjusted rates of the utility credits (or reimbursements); the utility credit (or reimbursement) rate with respect to residual petroleum product is further adjusted from \$.0572 to \$.0598, and the utility credit (or reimbursement) rate with respect to unenhanced diesel product is further adjusted from \$.0576 to \$.0602.

The adjusted petroleum business tax rates are obtained by multiplying the existing rates by a fraction, the numerator of which is the sum of the monthly producer price indices (unadjusted) for refined petroleum products for the twelve consecutive months ending with the month of August 2006, and the denominator of which is the sum of the monthly producer price indices (unadjusted) for refined petroleum products for the twelve consecutive months ending with the month of August 2005. Such monthly producer price indices for the twelve consecutive months ending with the month of August 2006, are 200.7, 214.9, 171.5, 172.1, 177.2, 169.3, 184.6, 207.4, 215.6, 220.5, 220.3, and 220.4 which total 2374.5. Such monthly producer price indices for the twelve consecutive months ending with the month of August 2005, are 125.2, 142.8, 136.6, 120.8, 126.2, 133.0, 148.6, 155.3, 150.7, 156.4, 169.9, and 179.0 which total 1744.5. The producer price index for the category of commodities designated as refined petroleum products is published monthly by the Bureau of Labor Statistics of the U.S. Department of Labor. As required by law, the adjusted rates, except the utility credit (or reimbursement) rates and the rate of supplemental petroleum business tax with respect to automotive-type diesel motor fuel, have been rounded to the nearest tenth of one cent. The utility credit (or reimbursement) rates and the rate of supplemental petroleum business tax with respect to automotive-type diesel motor fuel have been rounded to the nearest hundredth of one cent. Section 301-a of the Tax Law does not allow the rates to change by more than 5 percent of the rates in effect on December 31. The above rates reflect this limitation.
