PUBLIC NOTICE

Department of State

F-2004-0863

Date of Issuance - March 2, 2005

The New York State Department of State (DOS) is required by Federal regulations to provide timely public notice for the activities described below, which are subject to the consistency provisions of the Federal Coastal Zone Management Act of 1972, as amended.

The applicant has certified that the proposed activity complies with and will be conducted in a manner consistent with the approved New York State Coastal Management Program. The applicant's consistency certification and accompanying public information and data, including supplemental material submitted to the Department of State on February 14, 2005, are available for inspection at the New York State Department of State offices located at 41 State Street in Albany, New York.

In F-2004-0863, the St. Lawrence Cement Company has proposed: the construction and operation of a cement manufacturing facility in a quarry at the company's existing quarry site in the Town of Greenport, Columbia County; the reconstruction of an existing bulkhead, rehabilitation and expansion of an existing dock and the construction of a two-way elevated conveyor system for the movement of material between dock facilities in the City of Hudson, Columbia County and the manufacturing facility in Greenport, dredging the nearshore area in Hudson to accommodate "Hudson Max" vessels, and construction of rock revetments south of the existing bulkhead in Hudson. The company also proposes to create new or restore shallow water habitat in South Bay, south of the proposed facilities in Hudson.

As part of the project, certain of the company's existing cement manufacturing operations would cease in Catskill, Green County. SLC would retain ownership of and continue to rely upon the Catskill site for materials handling and other logistical support for the new Greenport and Hudson facilities. Continued activities at the Catskill site would include some grinding, packaging, storage, and shipping, as

well as cement kiln dust (CKD) landfilling when CKD generated at the Greenport facility would not be beneficially reused or recycled. The company would dismantle or otherwise remove several large bunker silos on the Catskill waterfront and a large, deteriorated hopper at the Hudson dock would be dismantled and removed.

Any interested parties and/or agencies desiring to express their views concerning any of the above proposed activities may do so by filing their comments, in writing, no later than 4:30 p.m., **March 18, 2005**. Interested parties who have already submitted comments are advised that those comments will be included in the Department's review of the proposed activities.

Comments should be addressed to the Division of Coastal Resources and Waterfront Revitalization, New York State Department of State, 41 State Street, Albany, New York 12231. Telephone (518) 474-6000; Fax (518) 473-2464.

This notice is promulgated in accordance with Title 15, Code of Federal Regulations, Part 930.

PUBLIC NOTICE

Uniform Code Regional Boards of Review

Pursuant to 19 NYCRR 1205, the petitions below have been received by the Department of State for action by the Uniform Code Regional Boards of Review. Unless otherwise indicated, they involve requests for relief from provisions of the New York State Uniform Fire Prevention and Building Code. Persons wishing to review any petitions, provide comments, or receive actual notices of any subsequent proceeding may contact Roy Scott, Codes Division, Department of State, 41 State Street, Albany, NY 12231, (518) 474-4073 to make appropriate arrangements.
