

MISCELLANEOUS NOTICES/HEARINGS

Notice of Abandoned Property Received by the State Comptroller

Pursuant to provisions of the Abandoned Property Law and related laws, the Office of the State Comptroller receives unclaimed monies and other property deemed abandoned. A list of the names and last known addresses of the entitled owners of this abandoned property is maintained by the office in accordance with Section 1401 of the Abandoned Property Law. Interested parties may inquire if they appear on the Abandoned Property Listing by contacting the Office of Unclaimed Funds, Monday through Friday from 7:00 a.m. to 5:00 p.m., at:

1-800-221-9311 (In New York State)
(518) 270-2200 (Outside New York State)

or visit our web site at:
www.osc.state.ny.us

Claims for abandoned property must be filed with the New York State Comptroller's Office of Unclaimed Funds as provided in Section 1406 of the Abandoned Property Law. For further information contact: Office of the State Comptroller, Office of Unclaimed Funds, 110 State St., Albany, NY 12236

PUBLIC NOTICE

**Rockland County Solid Waste Management Authority
Request for Proposals for Sludge Cocomposting Facility
Operations and Maintenance and Initial Capital Improvements**

The Rockland County Solid Waste Management Authority is issuing a Request For Proposals (RFP) for a Contractor to operate and maintain its Cocomposting Facility located in Hillburn, New York and to implement Initial Capital Improvements. The Contractor shall (1) furnish all labor, materials, supplies and equipment as detailed in the RFP; (2) produce Compost Products in accordance with specifications set forth in the RFP by processing wastewater Acceptable Sludge and other Acceptable Feedstock as defined in the RFP; (3) operate and maintain all equipment (except the Facility scales); (4) account for, store, and market the recovered material ensuring its Beneficial Use, and dispose of rejects at the adjacent Transfer Station or an alternate disposal facility; (5) complete certain capital improvements; and (6) secure all required construction related permits.

The RFP will be available beginning on January 7, 2005 and may be obtained from: Rockland County Solid Waste Management Authority, 420 Torne Valley Rd., Hillburn, NY 10931, (845) 753-2200

The RFP is being made available to Proposers in compliance with New York State Municipal Law, Section 120-w. Details on Proposal submission requirements are contained in the RFP. Proposals are due on February 24, 2005.

PUBLIC NOTICE

Department of State
F-2004-1047 (DA)

Date of Issuance - January 19, 2005

The New York State Department of State (DOS) is required by Federal law to provide timely public notice for the activity described below, which is subject to the consistency provisions of the Federal Coastal Zone Management Act of 1972, as amended.

The United States Environmental Protection Agency has determined that the proposed activity complies with and will be conducted in a manner consistent to the maximum extent practicable with the approved New York State Coastal Management Program. The consistency determination and accompanying public information and data is available for inspection at the New York State Department of State offices located at 41 State Street in Albany, New York.

In F-2004-1047 (DA), the United States Environmental Protection Agency's is proposing a remedial action, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended, for Operable Unit (OU) 4 of the Li Tungsten Superfund Site, located in the City of Glen Cove, Nassau County, New York.

In September of 2000, the US Army Corps of Engineers (ACE) initiated navigational dredging for the inner half of Glen Cove Creek (from mile 0.55 to the head), using remediated Parcel A of the Li Tungsten Superfund Site as temporary dewatering area. However, during implementation of the dredging project, it was determined that dredge spoils from this action contained radioactive slag, and dredging activities were indefinitely suspended. EPA determined that the contaminated spoils qualified for a Superfund removal action. After this removal action was completed, additional investigations determined that more radioactive slag still remained in the undredged portion of Glen Cove Creek. The proposed remedy for OU4 will address the ongoing release of radionuclides from creek sediments through performance of remedial dredging activities and sediment dewatering/remediation.

The proposed remedial action consists of the construction of a bermed dewatering facility on Parcel A of the Li Tungsten Superfund

Site, followed by clamshell dredging of Glen Cove Creek to the navigational maintenance depth of eight feet below mean low water. An additional phase of dredging to remove elevated gamma "hot spots" in the channel and its shoulders would also be conducted. It is estimated that 20,500 cubic yards (cy) of material would be dredged, including 500 cy from removal of the "hot spots." After the material has been dewatered, it will be sorted into batches, laid out in six inches thick "lifts," and screened with gamma instrumentation to segregate radioactive material. It is expected that 6 cy of radioactive material will be segregated and stored in the Dickson Warehouse on the Li Tungsten Superfund Site.

EPA believes that the remedy as proposed will provide a long-term benefit to coastal resources by removing an ongoing source of radioactive contamination through remedial dredging, and should also have the effect of clearing the navigational channel in the creek.

Any interested parties and/or agencies desiring to express their views concerning the above proposed activity may do so by filing their comments, in writing, no later than 4:30 p.m., 15 days from the date of publication of this notice, or February 3, 2005.

Comments should be addressed to the Division of Coastal Resources and Waterfront Revitalization, New York State Department of State, 41 State Street, Albany, New York 12231. Telephone (518) 474-6000; Fax (518) 473-2464.

This notice is promulgated in accordance with Section 306(d)(14) of the Federal Coastal Zone Management Act of 1972, as amended.
