Date of Issuance - February 8, 2006

The New York State Department of State (DOS) is required by Federal law to provide timely public notice for the activity described below, which is subject to the consistency provisions of the Federal Coastal Zone Management Act of 1972, as amended.

The U.S. Army Garrison West Point has determined that the proposed activity complies with and will be conducted in a manner consistent to the maximum extent practicable with the approved New York State Coastal Management Program. The consistency determination and accompanying public information and data is available for inspection at the New York State Department of State offices located at 41 State Street in Albany, New York.

In F-2005-0757 (DA), the U.S. Army Garrison West Point (West Point) proposes to construct an Indoor Athletic Training Facility on Howze Field to support the multiple athletic programs at the United States Military Academy (USMA). An Indoor Athletic Training Facility with a full field would include a wall-to-wall, in-fill type artificial turf field with inlaid markings for football. This configuration would allow for a full-sized (360 feet [110 meters] by 160 feet [49 meters]) football field with 15-foot (4.5-meter) buffer around the entire field, with its southern elevation parallel to, and 50 feet (15 meters) to the north of, the Truxton Lacrosse Center. The eastern elevation of the building would be aligned with the eastern elevation of Truxton Lacrosse Center. This alternative would include an attached storage/office space totaling 2,500 square feet (232 square meters) and an attached indoor conditioning area 5,400 square feet (502 square meters). Both of these additional areas would be single story and would have peaked roofs attached to the sides of the main facility. Total development under this alternative would cover approximately 85,000 square feet (7,897 square meters). Exterior finishes would be designed to be compatible with surrounding facilities in terms of color, texture, and materials. The ceiling height of the facility is yet to be determined, but would be high enough to practice football and soccer kicks (approximately 65 feet, clear peak height).

Any interested parties and/or agencies desiring to express their views concerning the above proposed activity may do so by filing their comments, in writing, no later than 4:30 p.m., **15 days from the date of publication of this notice, or February 23, 2006.**

PUBLIC NOTICE

Department of State
 Notice of Proposed Routine Program Change
 to the New York Coastal Management Program

Federal regulations require New York State to provide public notice of its routine program change of the State's Coastal Management Program (CMP) to the general public, local governments, other state agencies and regional offices of relevant federal agencies.

Pursuant to 15 CFR 923.84(b), the New York State Department of State (DOS), which administers the CMP, has submitted to the federal Office of Ocean and Coastal Resource Management a routine program change to the CMP. The DOS considers this change to be routine, in accordance with 15 CFR 923.84, and requests OCRM's concurrence with this determination. The change is being made because the list of activities in the CMP, subject to consistency with the CMP and routine review by the DOS, has remained unchanged since initial approval of the CMP more than twenty years ago. The change covered by this request are updated references to the list of: 1) activities undertaken directly by or on behalf of Federal agencies (see 15 CFR Part 930, Subpart C); 2) requiring permits or other forms of authorization from Federal agencies (see 15 CFR Part 930, Subpart D); and 3) activities involving financial assistance from Federal agencies. These activities are subject to and require review by the Department of State in accordance with the consistency provisions of the Federal Coastal Zone Management Act (CZMA), its implementing regulations in 15 CFR Part 930, and the CMP. The updates to the existing list of activities does not change the types of activities subject to review by the Department, nor does it affect procedural or other elements of the CMP.

This program change also includes, in accordance with 15 CFR Part 930, Subpart I, a new listing of interstate activities (activities in states other than New York) that would have reasonably foreseeable effects on coastal resources and uses in New York. The review by DOS of these interstate activities, for consistency with the CMP, would be required.

The DOS has requested concurrence of the Office of Ocean and Coastal Resource Management, in the National Oceanic and Atmospheric Administration, that these actions constitute a routine program change in accordance with 15 CFR Part 923. Copies of the routine program change are available for review in Albany at the NYS Department of State Coastal Management Program offices at 41 State Street, Albany, NY 12231. Any comments on whether the action does or does not constitute a routine program change should be submitted by February 28, 2006 to: John King, Chief, Coastal Programs Division, Office of Ocean and Coastal Resource Management, National Ocean Service, U.S. Department of Commerce, 1305 East West Highway, Silver Spring, MD 20910

Further information regarding this action may be obtained by contacting: Steven C. Resler, Division of Coastal Resources, Department of State, 41 State St., Albany, NY 12231-0001, (518) 474-5290, e-mail: sresler@dos.state.ny.us
