PUBLIC NOTICE

Department of Taxation and Finance
Tax Law Article 13-A Rates

Pursuant to the provisions of subdivisions (e), (f), (g) and (h) of section 301-a, subdivision (b) of section 301-d, subdivisions (b) and (c) of section 301-e, subdivisions (a) and (c) of section 301-j and subdivision (a) of section 308 of the Tax Law, the Commissioner of Taxation and Finance hereby gives public notice regarding the petroleum business tax (Tax Law, Article 13-A) rate adjustment calculation and the resulting rates effective January 1, 2009 (effective March 1, 2009 for quarterly filers) as follows: The motor fuel and automotive-type diesel motor fuel rate is adjusted from \$.099 to \$.103; the nonautomotive-type diesel motor fuel rate is adjusted from \$.089 to \$.093; the residual petroleum product rate is adjusted from \$.068 to \$.071; the kero-jet fuel rate is adjusted from \$.065 to \$.068; the aviation gasoline rate is adjusted from \$.099 to \$.103; the rate of the supplemental tax on aviation gasoline is adjusted from \$.065 to \$.068; and the rate of the supplemental petroleum business tax is adjusted from \$.065 to \$.068. The separate rate of supplemental petroleum business tax with respect to automotive-type diesel motor fuel is adjusted from \$.0475 to \$.0505; it is computed by subtracting one and three-quarters cents from the adjusted rate of the supplemental petro-

leum business tax. The railroad diesel rate is adjusted from \$.086 to \$.090; it is computed by subtracting one and three-tenths cents from the motor fuel and automotive-type diesel motor fuel rate.

The utility credit (or reimbursement) rate with respect to residual petroleum product is adjusted from \$.0541 to \$.0568 and the utility credit (or reimbursement) rate with respect to unenhanced diesel product is adjusted from \$.0545 to \$.0572. The utility credit (or reimbursement) rates are further adjusted by adding one-half of one cent to the adjusted rates of the utility credits (or reimbursements); the utility credit (or reimbursement) rate with respect to residual petroleum product is further adjusted from \$.0591 to \$.0618, and the utility credit (or reimbursement) rate with respect to unenhanced diesel product is further adjusted from \$.0595 to \$.0622.

The adjusted petroleum business tax rates are obtained by multiplying the existing rates by a fraction, the numerator of which is the sum of the monthly producer price indices (unadjusted) for refined petroleum products for the twelve consecutive months ending with the month of August 2008, and the denominator of which is the sum of the monthly producer price indices (unadjusted) for refined petroleum products for the twelve consecutive months ending with the month of August 2007. Such monthly producer price indices for the twelve consecutive months ending with the month of August 2008, are 220.2, 219.5, 253.2, 238.8, 244.0, 246.9, 282.6, 291.1, 321.7, 340.9, 357.9, and 314.3, which total 3331.1. Such monthly producer price indices for the twelve consecutive months ending with the month of August 2007, are 185.1, 172.3, 172.2, 175.2, 163.2, 171.1, 194.1, 214.4, 230.1, 221.8, 233.4, and 213.0, which total 2345.9. The producer price index for the category of commodities designated as refined petroleum products is published monthly by the Bureau of Labor Statistics of the U.S. Department of Labor. As required by law, the adjusted rates, except the utility credit (or reimbursement) rates and the rate of supplemental petroleum business tax with respect to automotive-type diesel motor fuel, have been rounded to the nearest tenth of one cent. The utility credit (or reimbursement) rates and the rate of supplemental petroleum business tax with respect to automotive-type diesel motor fuel have been rounded to the nearest hundredth of one cent. Section 301-a of the Tax Law does not allow the rates to change by more than 5 percent of the rates in effect on December 31. The computed rate change was about 42 percent; all of the above rates were subject to the 5 percent limitation.
