PUBLIC NOTICE Department of Health

Pursuant to 42 CFR Section 447.205, the Department of Health hereby gives public notice of the following:

The Department of Health proposes to amend the Title XIX (Medicaid) State Plan for inpatient services to comply with enacted statutory provisions and adopted regulations. The following significant changes are proposed:

Institutional Services

The All Patient Refined (APR) case mix methodology utilizes diagnostic related groups with assigned weights that incorporate differing levels of severity of patient condition and associated risk of mortality. Based on previously enacted legislation and adopted regulation, these service intensity weights (SIWs) are updated annually by the Commissioner. The table of SIWs and statewide average lengths of stay (LOS) for each effective period is published on the New York State Department of Health website at: <http://www.health.ny.gov/nysdoh/hospital/drg/index.htm> and reflects the cost weights and LOS assigned to each All-Patient Refined (APR) diagnosis related group (DRG) patient classification category. For the period January 1, 2012 through December 31, 2012, the SIW and statewide average LOS table shall be computed using the Statewide Planning and Research Cooperative System (SPARCS) and reported cost data from the 2007, 2008 and 2009 calendar years as submitted to the Department by September 30, 2011.

There is no estimated annual change to gross Medicaid expenditures as a result of the proposed amendments.

The New York State Department of State (DOS) is required by Federal regulations to provide timely public notice for the activities described below, which are subject to the consistency provisions of the Federal Coastal Zone Management Act of 1972, as amended.

The applicant has certified that the proposed activity complies with and will be conducted in a manner consistent with the approved New York State Coastal Management Program. The applicant's consistency certification and accompanying public information and data are available for inspection at the New York State Department of State offices located at One Commerce Plaza, 99 Washington Avenue in Albany, New York.

In F-2011-0690, Metro-North Commuter Railroad is proposing the improvement in Sing Sing Creek to alleviate flooding of the Metro-North's bridges carrying tracks 1, 2, 3, and 4. The action involves the removal of 950 cubic yards of the existing accumulated material in the streambed that inhibits flow. Also, over a linear distance of 248' beneath the bridges the 950 cubic yards of the existing accumulated material will be replaced by a bottom slab. This slab consists of 14" of reinforced steel underlain by 6" of crushed stone with perforated

pipe. A reinforced concrete roof will also be placed above the area where the concrete slab will be placed. The work is proposed at Ossining Station, Village of Ossining, Westchester County, New York. The applicant has stated that the hydraulic opening will be increased from 100 square feet at this time to 140 square feet.

The stated purpose is to facilitate flow and sediment movement under the bridges, and to facilitate removal of any sediment that may build up in this area in the future.

Any interested parties and/or agencies desiring to express their views concerning the above proposed activities may do so by filing their comments, in writing, no later than 4:30 p.m., 15 days from the date of publication of this notice, or, December 22, 2011.
