PUBLIC NOTICE

Office of Alcoholism and Substance Abuse
and
Department of Health

Pursuant to 42 CFR Section 447.205, the New York State (NYS) Office of Alcoholism and Substance Abuse Services and the NYS Department of Health hereby give public notice of the following:

The State proposes to amend the Title XIX (Medicaid) State Plan regarding its methods and standards for coverage and reimbursement of Medicaid rehabilitative services. The following changes are proposed:

Effective simultaneous with the approval of CMS of the New York section 1115 demonstration amendment to enable qualified managed care organizations to meet the needs of participants with behavioral health needs, expected to occur on or after January 1, 2015, the coverage and reimbursement methodology regarding rehabilitative services will remove substance use disorder clinics from the Medicaid clinic option and cover the services provided by those facilities under rehabilitative services. This will allow Medicaid to reimburse outpatient services when provided in a site-based clinic, community setting or in the individual's place or residence when permitted under State practice laws. These services may be provided on-site or on a mobile basis as defined by the State certifying agency.

Rehabilitative services are defined as "any medical or remedial services recommended by a physician or other licensed practitioner of the healing arts, within the scope of his or her practice under State law, for maximum reduction of physical or mental disability and restoration of a recipient to his best possible functional level." The broad general language in this regulatory definition has afforded States considerable flexibility under their State plans to meet the needs of their State's Medicaid population.

Rehabilitative services are specialized services of a medical or remedial nature delivered by uniquely qualified practitioners designed to treat or rehabilitate persons for maximum reduction of physical or mental disability and restoration to his/her best possible functional level. These services will be provided to recipients on the basis of medical necessity.

The NYS Medical Assistance Program covers rehabilitative services provided to eligible Medicaid recipients by eligible providers.

This proposed change targets service delivery, specifically, substance use disorder and addiction treatment and is designed to ensure that quality rehabilitative services are provided in a coordinated manner that is in the best interest of the individuals, are limited to rehabilitative purposes and, are furnished by qualified providers.

The proposed change would also provide guidance to ensure that services claimed under the optional Medicaid rehabilitative benefit are rehabilitative individual-centered out-patient and residential services, are furnished by qualified providers, and are provided to Medicaid eligible individuals according to a goal-oriented, recovery focused rehabilitation plan.

Under this methodology, the State will add residential substance use disorder and addiction treatment in residential settings of 16 beds or less and provide such under rehabilitative services. This will allow the State to provide Medicaid eligible individuals recovery-oriented treatment designed to achieve changes in their substance use disorder behaviors.

There is no additional estimated annual change to gross Medicaid expenditures as a result of the proposed amendments.

The public is invited to review and comment on this proposed State Plan Amendment. Copies of which will be available for public review on the Department's website at http://www.health.ny.gov/regulations/state_plans/status.

Copies of the proposed State Plan Amendments will be on file in each local (county) social services district and available for public review.

For the New York City district, copies will be available at the following places:
