## PUBLIC NOTICE

Department of State  
F-2016-0525

Date of Issuance – September 14, 2016

The New York State Department of State (DOS) is required by Federal regulations to provide timely public notice for the activities described below, which are subject to the consistency provisions of the Federal Coastal Zone Management Act of 1972, as amended.

The applicant has certified that the proposed activity complies with and will be conducted in a manner consistent with the approved New York State Coastal Management Program. The applicant's consistency certification and accompanying public information and data are available for inspection at the New York State Department of State offices located at One Commerce Plaza, 99 Washington Avenue, in Albany, New York.

In F-2016-0525, The Town of Brookhaven is proposing a pilot project for the installation of a permeable reactive barrier (PRB) to intercept and filter a groundwater nitrogen plume before it reaches the surface waters of Wills Creek and Forge River in the Town of Brookhaven, Suffolk County. The PRB will consist of an eight foot depth trench dug along the south side of the road for a 190' length and 10' to 20' width, encompassing approximately 3,075 SF of surface area and 1000 CY of excavation. The area will be excavated and backfilled with mixed material of on-site soil and Town generated composted wood chips. After construction of the PRB, monitoring wells will be installed immediately south of the PRB to monitor the nitrogen removal ability of the PRB.

The project also proposes the removal of phragmites and its root mass within the area of the PRB and adjacent area and revegetation with native species. The adjacent area (7,575 SF) includes the area that will be disturbed by the construction and is proposed for phragmites root mass excavation and refilling of the void space. Due to the requirement of the barrier width, an 870 SF section of marsh will be disturbed. The Town proposes to mitigate the loss by the regrading and replanting of 1,500 SF of intertidal marsh immediately east of the impacted area. The Town proposes additional phragmites removal and replanting of additional marsh and upland plants west of the PRB (7,530 SF).

Any interested parties and/or agencies desiring to express their views concerning any of the above proposed activities may do so by filing their comments, in writing, no later than 4:30 p.m., 30 days from the date of publication of this notice, or, October 14, 2016.

Comments should be addressed to the Consistency Review Unit, New York State Department of State, Office of Planning and Development, One Commerce Plaza, 99 Washington Avenue, Albany, New York 12231. Telephone (518) 474-6000; Fax (518) 473-2464. Electronic submissions can be made by email at: CR@dos.ny.gov.

This notice is promulgated in accordance with Title 15, Code of Federal Regulations, Part 930.

Draft Local Waterfront Revitalization Program

PURSUANT to Article 42 of the New York State Executive Law and 19 NYCRR Part 601, the New York State Department of State (DOS) has accepted a Draft Local Waterfront Revitalization Program (LWRP) for the City of Jamestown, located within Chautauqua

County and the Western New York Region. The LWRP serves as a comprehensive management program for the City's natural, public, and developed waterfront resources along the Chadakoin River.

To approve the City of Jamestown LWRP, the Secretary of State must find that it is consistent with Article 42 of the Executive Law and that it does not conflict with existing State programs and policies.
