PUBLIC NOTICE

Department of Environmental Conservation Notice of Plant Cultivars Exempt from 6 NYCRR Part 575

Project Description:

A regulation, 6 NYCRR Part 575 Prohibited and Regulated Invasive Species, was adopted in July 2014 that prohibits or regulates the possession, transport, importation, sale, purchase and introduction of certain invasive species. The purpose of this regulation is to help control invasive species by reducing their introduction and spread.

This regulation became effective March 10, 2015. Section 575.8 of the regulation provides an exemption for cultivars of prohibited or regulated species for which the Department of Environmental Conservation determines that: 1) the primary means of reproduction of the cultivar's parent species is sexual, not vegetative, and 2) that the cultivar and its offspring do not revert to express the invasive characteristics of the parent.

The Department has assessed several cultivars of prohibited and regulated species, using a standard scientifically rigorous assessment protocol, and has determined that the cultivars listed below meet the

exemption qualifications of 575.8(a)(4). Individual cultivar assessments are available upon request. Therefore, a person may legally possess, sell, import, purchase, transport, or introduce the following plant cultivars and no labeling requirements apply:

PUBLIC NOTICE
Department of Health

Pursuant to 42 CFR Section 447.205, the Department of Health hereby gives public notice of the following:

The Department of Health proposes to amend the Title XIX (Medicaid) State Plan for non-institutional services to comply with Chapter 550 of the laws of 2014. The following changes are proposed:

Non-Institutional Services

The amendments to public health law, insurance law and the social services law changed the definitions of telehealth modalities and practitioners entitled to receive reimbursement for provision of services via telehealth. These revisions are necessary to further align with amendments to the public health law, insurance law and social services law related to the delivery and reimbursement of health care services via telehealth. Medicaid has been covering services provided via telemedicine since 2011. These statutory amendments are intended to expand the reimbursement of health care services provided via telehealth and establish guidelines for the safe and effective delivery of such services. They will serve to eliminate barriers to care resulting

from distance and practitioner shortage and will benefit NYS Medicaid enrollees by improving access to medical care and services.

The amendments will also serve to increase access to health care services by eliminating barriers to care faced by Medicaid recipients in rural communities and in areas where there is a shortage of health care practitioners. In addition, they will make it possible for telehealth providers at distant sites to collect/monitor health information and medical data from Medicaid recipients with chronic impairments and technology dependent care needs, who are located at originating sites. This amendment will be effective on or after July 1, 2017.

The estimated annual net aggregate increase in gross Medicaid expenditures attributable to this initiative contained in the budget for state fiscal year 2017/2018 is \$1.25 million.

The public is invited to review and comment on this proposed State Plan Amendment. Copies of which will be available for public review on the Department’s website at http://www.health.ny.gov/regulations/state_plans/status.

Copies of the proposed State Plan Amendments will be on file in each local (county) social services district and available for public review.
