

CONSULTATION WITH OTHER AFFECTED FEDERAL, STATE, REGIONAL AND LOCAL AGENCIES

The governmental agencies having an interest with an announcement of the forthcoming publication of the draft LWRP were contacted in May, 1984. (See 31 May 1984 Memorandum attached). Those agencies wishing to review the document were requested to contact the Regional Planning Board. Responses were received from the following:

1. NYS Facilities Development Corporation
2. NYS Department of Parks, Recreation and Historic Preservation
3. U.S. Fish and Wildlife Service
4. NYS Department of Environmental Conservation
5. Dormitory Authority of the State of New York
6. NYS Emergency Management Office
7. NYS Urban Development Corporation
8. State University Construction Fund
9. NYS Energy Research and Development Authority
10. St. Lawrence - Eastern Ontario Commission

The responsibility for further consultation with cognizant agencies has been assumed by the NYS Department of State, as part of its state agency coordination activities.

Review comments on the Draft LWRP and Draft Environmental Impact Statement received at a public hearing and/or in writing were analyzed by the City Common Council, Local Waterfront Revitalization Advisory Committee and Regional Planning Board Staff. The comments received and resulting changes made in the Draft LWRP document are detailed in the Final Environmental Impact Statement for the LWRP, which is kept on file for public inspection at the City Clerk's Office.

RE: City of Oswego, Oswego County, New York
Local Waterfront Revitalization Program

The City of Oswego, in cooperation with the NYS Department of State and the Central New York Regional Planning and Development Board, is in the process of developing a Local Waterfront Revitalization Program (LWRP) for the area shown on the attached map. The LWRP establishes policies and guidelines for future development/redevelopment within this area. As an agency administering programs which, at some future date, could affect the City's waterfront revitalization efforts, you may wish to review the Draft LWRP report. We expect the report to be available for review and comment on 15 June 1984.

If you would like to receive a copy of the report for review, please let us know by 10 June. Requests should be directed to:

OSWEGO WATERFRONT REVITALIZATION AREA

--- BOUNDARY

The preparation of this map was financially aided through a federal grant from the Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration under the Coastal Zone Management Act of 1972, as amended. This map was prepared for the New York State Department of State.

Local Commitment

Local commitment and support for the Oswego LWRP has been undertaken by the Oswego Waterfront Revitalization Program Advisory Committee. The Committee was the LWRP support group, consisting of elected officials, public agency and private industry representatives, members of private groups, and individuals interested in the waterfront.

The Advisory Committee was responsible for developing broad-based support for, and commitment to, the LWRP and the alternatives selected for resolving the issues concerning how the waterfront area can be developed to achieve a compatible mixture of industrial, commercial, recreational or other uses; allow for active use of the water by commercial shipping interests and the Port Authority operations; and, provide for pleasure boating and shoreline fishing.

The Committee also ensured public participation in the preparation of the LWRP and provided a vehicle for coordinating the LWRP with the Port of Oswego Development Study, as well as other waterfront activities being undertaken, such as the City's development of Wright's Landing, the Oswego Maritime Foundation's development of the Boating Education Center, and the development of the West Bank Linear Park and the design of the East Bank Park.

See attached roster for Committee membership.

In this manner, significant contributions of time, interest and expertise were drawn from Oswego's businessmen and residents into the preparation of the Local Waterfront Revitalization Program. Citizen input improved the data base, verified program information, evaluated various alternatives and expressed the values and concerns of the community.

Following the completion of the draft program, the Advisory Committee formally approved the draft and forwarded it to the City Common Council. Upon approval of the City Common Council, the draft document, including the draft Environmental Impact Statement (EIS), were submitted to the NYS Department of State for distribution to federal and State agencies for a 60-day review period, required by NYS Executive Law, Article 42. At the same time the draft documents were filed and distributed as required by the NYS Environmental Quality Review Act. As a result, there were a number of comments received from which further revisions and refinements were described in the final EIS and incorporated into the final LWRP document. The final program document, then, was adopted by the City Common Council and submitted to the NYS Secretary of State for approval.
