

**SECTION VI  
STATE AND FEDERAL ACTIONS AND PROGRAMS  
LIKELY TO AFFECT IMPLEMENTATION**

State and federal actions will affect and be affected by implementation of a Local Waterfront Revitalization Program (LWRP). Under State law and the U.S. Coastal Zone Management Act, certain State and federal actions within or affecting the local waterfront area must be "consistent" or "consistent to the maximum extent practicable" with the enforceable policies and purposes of the LWRP. This consistency requirement makes the LWRP a unique, intergovernmental mechanism for setting policy and making decisions and helps to prevent detrimental actions from occurring and future options from being needlessly foreclosed. At the same time, the active participation of State and federal agencies is also likely to be necessary to implement specific provisions of the LWRP.

Pursuant to the State Waterfront Revitalization of Coastal Areas and Inland Waterways Act (Executive Law, Article 42), the Secretary of State notifies affected State agencies of those agency actions and programs which are to be undertaken in a manner consistent with approved LWRPs. The following list of State actions and programs is that list. The State Waterfront Revitalization of Coastal Areas and Inland Waterways Act requires that a LWRP identify those elements of the program which can be implemented the local government, unaided, and those that can only be implemented with the aid of other levels of government or other agencies. Such statement shall include those permit, license, certification, or approval programs; grant, loan, subsidy, or other funding assistance programs; facilities construction; and planning programs which may affect the achievement of the LWRP. Federal agency actions and programs subject to consistency requirements are identified in the New York State Coastal management Program and by the implementing regulations of the U.S. Coastal Zone Management Act.

The second part of this section is a more focused and descriptive list of State and federal agency actions which are necessary to further implementation of the LWRP. It is recognized that a State or federal agency's ability to undertake such actions is subject to a variety of factors and considerations; that the consistency provisions referred to above, may not apply; and that the consistency requirements cannot be used to require a State or federal agency to undertake an action it could not undertake pursuant to other provisions of law. Reference should be made to Section IV and Section V, which also discuss State and federal assistance needed to implement the LWRP.

**B. STATE AND FEDERAL PROGRAMS NECESSARY TO FURTHER THE LWRP**

1. STATE ACTIONS OR PROGRAMS

a. Department of Environmental Conservation

Under the Stream Protection Act Regulations, the Department of Environmental Conservation should upgrade the stream classifications of the Landsman Kill to "B(T)," the Rhinebeck Kill to "C(T)," the Fallsburg Creek to "C(T)" and the Mudder Kill to "C."

b. Department of Transportation

Maintenance of the Rhinecliff vehicular bridge and the refurbishing of the pedestrian bridge over the railroad tracks are essential to continued use of recreational facilities on the Hudson River in Rhinecliff. The Department of Transportation should give these overhead crossings high priority in whatever ways necessary and appropriate for maintaining these public access facilities.

c. Office of General Services

Prior to any development occurring in the water or on the immediate waterfront, OGS should be consulted for a determination of the State's interest in underwater or formerly underwater lands and for authorization to use and occupy these lands.

## 2. FEDERAL ACTIONS OR PROGRAMS

### a. Department of Transportation, Amtrak, Conrail

Among the Town's most valuable natural resources are the various coves and wetlands along the Hudson River, particularly the Vandenburg and Suckley Coves. These are threatened by railroad maintenance practices including (1) the spraying of the railroad bed and surrounding area with herbicides, (2) the scattering of discarded railroad ties which are permeated with creosote or other wood preservatives, and (3) the pushing of vegetation from near the tracks into the coves which may add herbicides or increase nitrogen levels of the coves.

The Department of Transportation through Amtrak and Conrail should develop maintenance practices which will not contribute pollution to the Hudson River coves and wetlands.

The Rhinecliff Bridge provides access to a substantial amount of shorefront land, including the Rhinebeck Town Landing/Dock area, and is the only public vehicular above grade crossing in the Town. The feasibility of maintaining the public park and dock along the Hudson River in Rhinecliff depends largely upon the continued existence of the Rhinecliff vehicular bridge. Continuing maintenance of the pedestrian bridge at Rhinecliff would facilitate approach to the dock.

In addition, the private vehicular bridge located at The Meadows could provide public access in the future as part of new development or negotiations with the landowners.

The cooperation of the Department of Transportation through the Conrail and Amtrak operations is necessary to keep all of these bridges in place and provide adequate maintenance to the Rhinecliff vehicular bridge and upgrading and subsequent maintenance of the Rhinecliff pedestrian bridge.
